

Table DF – 2: CAPITAL ADEQUACY**Qualitative disclosures:**

Reserve Bank of India has issued guidelines on implementation of Basel III capital regulations in India to be implemented in a phased manner effective from April 1, 2013 with Banks disclosing Basel III capital ratios from the quarter ending June 30, 2013. The bank is complying with the same.

The Bank has computed capital for market risk and operational risk as per the prescribed guidelines at the bank's Central Office, based on the relevant data. In computation of capital for Credit risk under Standardized Approach, the bank has relied upon the borrower-wise data captured from each individual branch besides portfolios held at Central Office of the bank. In all loan types, the credit risk capital computation is done on borrower basis or facility type basis as per the segmentation advised in the RBI guidelines. For this purpose, the Bank has developed in-house software, which enables computation of capital for credit risk of the advances portfolio of the branches and generation of the requisite reports at the Branch level, Regional Office level and Central Office level through CBS System.

RBI has prescribed that banks are required to maintain a minimum total capital (MTC) of 9% of total risk weighted assets (RWAs) i.e. capital to risk weighted assets (CRAR). The framework issued by RBI prescribes maintenance of a minimum Tier-1 CRAR of 7% with a minimum CET 1 of 5.5%. Total Capital (Tier 1 Capital plus Tier 2 Capital) must be at least 9% of RWAs on an ongoing basis. As per Basel III guidelines, in addition to the minimum Common Equity Tier 1 capital of 5.5% of RWAs, banks are also required to maintain a capital conservation buffer (CCB) of 2.50% of RWAs in the form of Common Equity Tier 1 capital with a transitional arrangement from 31.03.2016 to 31.03.2020 with an increase of 0.625% every year. However, RBI vide circular No. RBI/2020-21/93 DOR.CAP.BC.No.34/21.06.201/2020-21 of 05.02.2021 has informed the deferment of the implementation of the last tranche of 0.625% of Capital Conservation Buffer (CCB) from April 1, 2021 to October 1, 2021. As on 31.12.2021, Banks should maintain CCB of 2.50%.

Capital Conservation Buffer is designed to ensure that Banks build up capital buffer during normal time (i.e. outside period of stress) which can be drawn down as losses are incurred during stressed period. Bank has maintained the CET1 percentage with CCB as on 31.12.2021. Bank has been maintaining capital adequacy (including CCB) on an ongoing basis.

The Bank has put in place a policy on Internal Capital Adequacy Assessment Process (ICAAP) and the framework in consideration of the relevant risk factors of the bank as a measure towards adequacy of capital available to meet the residual risk as part of Pillar 2 requirements of the revised framework commensurate with the bank's overall risk profile. In framing the policy, the bank has taken into consideration the requirements prescribed by the RBI in their guidelines and bank's risk appetite.

As part of Basel III framework RBI has introduced Leverage Ratio concept. The leverage ratio is the ratio of Tier-1 capital (Common Equity + Additional Tier I) and total exposure (as defined under Basel III). The leverage ratio has to be maintained on a quarterly basis. Final guidelines were issued vide RBI circular RBI/2018-19/225 DBR.BP.BC.No.49/21.06.201/2018-19 dated: 28.06.2019 where in it was decided that Non - Domestic Systemically Important Banks (DSIBs) have to maintain a leverage ratio of 3.50% w.e.f 01.10.2020. Bank's Leverage Ratio for the December 2021 is 4.98% which is above the desired level of 3.50% as stipulated by RBI.

RBI has issued guidelines on two minimum standards Viz. Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) for funding liquidity. The LCR promotes short term resilience of banks to potential liquidity disruptions by ensuring that bank have sufficient high quality liquid assets (HQLA) to survive an acute stress scenario lasting for 30 days.

Bank has calculated LCR for all working days over the December, 2021 quarter. Bank's LCR for the quarter ended December' 2021 stands at 176.81% based on daily average of three months (Q3 FY 2021-22) and is well above the minimum requirement prescribed by RBI of 100%. Bank is having enough liquidity to meet sudden cash outflows.

The NSFR promotes resilience over a longer-term time horizon by requiring banks to fund their activities with more stable sources of funding on an ongoing basis.

Bank has calculated NSFR for 31st December 2021 stands at 152.61% which is well above the RBI prescribed minimum requirement of 100%. Bank is having enough stable sources of funding to fund their activities on an ongoing basis over a longer-term time horizon.

• Common Equity Tier-I Capital Ratio	12.94%

Table DF-3:**Qualitative Disclosures****CREDIT RISK: GENERAL DISCLOSURES FOR ALL BANKS**

Credit Risk is the possibility of losses associated with diminution in the credit quality of borrowers or counter parties. In a Bank's portfolio, Credit Risk arises mostly from lending and investment activities of the Bank if a borrower / counterparty is unable to meet its financial obligations to the lender/investor. It emanates from changes in the credit quality/worthiness of the borrowers or counter parties. Credit risk also includes counterparty risk and country risk.

Credit rating and Appraisal Process:

The Bank manages its credit risk through continuous measuring and monitoring of risks at obligor (borrower) and portfolio level. The Bank has a robust internal credit rating framework and well-established standardized credit appraisal / approval process. Credit rating is a facilitating process that enables the bank to assess the inherent merits and demerits of a proposal. It is a decision enabling tool that helps the bank to take a view on acceptability or otherwise of any credit proposal.

The rating models factor quantitative and qualitative attributes relating to Risk components such as Industry Risk, Business Risk, Management Risk, Financial Risk, Project risk (where applicable) and Facility Risk etc. The data on industry risk is regularly updated supported by CRISIL based on market conditions.

Bank has implemented "Retail Scoring Models" for Pushpaka (Vehicle Loan), Clean Loan and Housing loan irrespective of the amount w.e.f 02.01.2017.

The bank follows a well-defined multi layered discretionary power structure for sanction of loans and advances. Approval Committees have been constituted at all levels covering Exceptionally Large branch / RO / CO for recommending fresh/enhancement proposal to appropriate sanctioning authorities. Specific Sanctioning Powers have been delegated to Branch Managers.

The new Products/Process/Services introduced by Bank and Modification of existing Product/Process/Services are examined at the Head Office level by Risk Management Department depending upon the type of risks involved in the new

product / process. Then it shall be examined by two committees at Head Office level namely Product/Process Risk Mitigation Committee (PRMC) and Business Process Re-engineering committee (BPR) before launching the product/process/service.

Credit Risk Management Policies

The bank has put in place a well-structured loan policy and credit risk management policy duly approved by Board. The policy document defines organizational structure, role and responsibilities and processes whereby the Credit Risk carried by the Bank can be identified, quantified and managed within the framework that the Bank considers consistent with its mandate and risk tolerance. Credit risk is monitored by the bank on a bank-wide basis and compliance with the risk limits approved by Board / RMCB is ensured.

The Credit Risk Management Committee (CRMC) takes into account the risk tolerance level of the Bank and accordingly handles the issues relating to Safety, Liquidity, Prudential Norms and Exposure limits.

The bank has taken earnest steps to put in place best credit risk management practices in the bank. In addition to Loan Policy and Credit Risk Management Policy, the bank has also framed Funds and Investment Policy, Counter Party Risk Management Policy and Country Risk Management Policy etc., which forms integral part of monitoring of credit risk in the bank. Besides, the bank has implemented a policy on collateral management and credit risk mitigation which lays down the details of securities (both prime and collateral) normally accepted by the Bank and administration of such securities to protect the interest of the bank. Presently, some select securities act as mitigation against credit risk (in capital computation), to which the bank is exposed.
